Micro Joystick PLUS

- **Simple**
- **Lightweight**
- **Cost Effective**

The **Micro Joystick PLUS** from BR Remote is a full size cost-effective menu driven joystick. For many applications the functionality of this joystick is all that's required.

Originally designed to complement our **Micro L Head** it can control any BR Remote, remote head and various cameras. It can address any head ident from 1 to 32 and can even re-assign the ident.

It employs a full size, 3-axis joystick which enables simultaneous control of pan, tilt, zoom or pan, tilt & focus at a touch of the button. The joystick is also used to cycle through the extensive menu functions. It has both remote head and CCU functions. Using an optional cable it can accept data from our RCPs to offer full CCU control of the camera.

Joystick Functions: Pan, Tilt, Zoom, Focus & Menu navigation
