

# Quad Joystick

The **Quad Joystick** is a 4 camera controller useful where space is at a premium. The LCD display and the associated controls offer access to the majority of remote camera functions.

The controller is constructed from an aluminium extrusion with fully machined end plates which incorporate the input/output socket and the focus control. Rubber inserts on the end plates and soft touch knobs give a comfortable feel to the controller and offer good grip on hard surfaces.

## Primary Functions

The main functions are accessed directly via the dedicated knobs and buttons. The LCD display will show the iris values as they are changed.

3 axis Joystick  
End Wheel  
Knob  
Touch Down  
Button  
4 x Buttons

**Pan, Tilt & Zoom**  
**Focus**  
**Iris**  
**Iris Auto/Manual**  
**Record / Stop**  
**Camera Select 1-4**

All other functions are accessed via the mini LCD display using the associated knob and the associated button.

Output Standard - (1080i/50,1080i/60, 720p/50, 720p/60, PAL 4:3/16:9, NTSC 4:3/16:9)  
Power Up Memory On/Clear  
Digital Zoom On/Off  
Zoom Limit On/Off  
Remote Relay On/Off  
Auto Focus On/Off  
Roll Enable & Trim

- Other functions added as required

## RCP Input

A simple upgrade enables the **Quad Joystick** to accept remote data from any **BR-Remote** RCP. This requires a special cable and a code entry to activate the software. When ordering this at a later date you will need the serial number.

## Specifications

Power:	12v, 200mA
Dimensions:	W320mm, H70mm, D115mm
Output:	XLR4 - RS485
Input (from RCP)	XLR4 - RS485
Max Cable Length:	<b>1km</b>
