

- Simple & Cost Effective
- Standard Protocols
- Rugged and Durable
- Optional RCP input

The **Mini Joystick 2** has our standard backlit membrane panel technology and with added functionality. All the most common controls remain with the addition of 4 pre-set positions and other often needed controls. It outputs our standard RS485 data via an industry standard XLR connector.

It can be used with any of the **BR-Remote** heads and cameras where only the basic controls are required. An optional RCP input can be fitted to enable CCU control via one of our RCP controllers.

As with all our controllers, power and data are carried on a single XLR4 cable to the remote head making connection and operation very simple.

Joystick:

Pan, Tilt, Zoom

Buttons:

Focus Near, Focus Far, Auto Focus, Iris Open, Iris Close, Auto Iris, IR On/Off, White Balance, Reverse, Speeds (4), Camera 1 or 2
