

Mini Positioning Head

Instructions

Operation

The **MiniPos2** is very lightweight positioning head for small cameras. It is specifically designed to re-position small camera and is NOT capable of smooth moves.

Each **MiniPos2** can store up to 8 pre-set positions of both Pan and Tilt.

Using any BR Remote controller, move the head to a position you want to store and store the position. This procedure is different for every controller and will be detailed in the controller instructions.
